

Collectors can distinguish different types of the head lamp based on the terminal shape of the widgets.

Squire Cylinder For Upper Position Lamp

Round Cylinder For Lower Position Lamp

### Upper Position Lamp Installation

1. The lamp with short and squire cylinder shall be installed on the upper position on the grille.
2. The sockets for the upper lamps are located in the lowest grid of the third column of the grille.
3. Simply input the squire cylinder of the widget in the socket to fix the lamp on the front grille.

Please refer to the red arrow on the illustration.

### Lower Position Lamp Installation

There are two ways to fix the lower lamps on the grille. The lamps with an extra round cylinder part shall be installed on the lower position.

#### Method one.

1. First, drill with 1.3mm driller on the shown position of the illustration.

2. Simply input the lamp into the drilled hole.

**Method two.**

Collectors can fix the lower lamps by glue adhesion.

1. Cut off the extra round tube part to achieve a bonded area.

2. Use glue to fix the lower lamps on the pointed position on the illustration. The 502 glue or similar adhesives are highly suggested.
